

# Part A Meeting Notes // HSC SDD

<b>DATE:</b> 2024-02-29 <b>PERIOD:</b> 3	<b>PRESENT:</b> Student Name, Mr Dunne (Teacher) <b>LOCATION:</b> C5
<b>AGENDA ITEM:</b>	<b>DISCUSSION:</b>
Meeting Open: 11:12am	
<b>Documentation:</b>	<ul style="list-style-type: none"> <li>- Go over each and confirm I'm on right track               <ul style="list-style-type: none"> <li>- No issues</li> </ul> </li> <li>- Do all connections need to be two-way on the data flow diagrams               <ul style="list-style-type: none"> <li>- No</li> </ul> </li> <li>- What if I'm not finished with all my functions yet? Do I just include in the diagrams what I've done so far?               <ul style="list-style-type: none"> <li>- Todo: comments, recommender algorithm, profanity filter, challenges, messaging etc.</li> <li>- Too many tracks coming out of home screen → no space for more</li> <li>- Include all functions. Can make certain functions larger to accommodate space</li> </ul> </li> <li>- Haven't made more complex features yet (AI, recommender algorithm, profanity filter) so should I just choose an existing function for my level 2 DFD and if so can I still achieve the top marks? Or wait until I've made some of the more complex features?               <ul style="list-style-type: none"> <li>- It would be beneficial to use one of the more complex functions for the level 2 dfd.</li> </ul> </li> </ul>
<b>Logbook:</b>	<ul style="list-style-type: none"> <li>- No issues</li> <li>- Am I writing enough?</li> <li>- Am I specific enough?</li> <li>- Should I screenshot more code snippets?</li> <li>- No issues. Keep doing what you're doing.</li> </ul>
<b>Assets:</b>	<ul style="list-style-type: none"> <li>- Do I have to make my own icons?</li> <li>- Make the icons, show screenshots, font, etc</li> </ul>
<b>Coding:</b>	<ul style="list-style-type: none"> <li>- Thoroughness of comments?</li> <li>- How sophisticated should my recommendation algorithm be?</li> <li>- Sporadic comments (not every line)</li> <li>- Recommender algorithm can be super simple</li> </ul>
<b>Possible Adjustments from Proposal:</b>	<ul style="list-style-type: none"> <li>- Is it worth adding heaps of extra features or am I sufficiently meeting all the top criteria already?               <ul style="list-style-type: none"> <li>- Messaging system, mobile/tablet styles</li> <li>- Check phone width and make it viewable on this</li> </ul> </li> </ul>
<b>Other Items/Concerns:</b>	<ul style="list-style-type: none"> <li>- What if diagrams change before submitting final project               <ul style="list-style-type: none"> <li>- Functions I still need to add → challenges, filter-profanity etc.</li> <li>- Use my best judgement to try and include everything</li> </ul> </li> <li>- Does my HTML, SCSS, database, hosting etc. get marked equally?               <ul style="list-style-type: none"> <li>- If python stuff is good he doesn't need to mark HTML and</li> </ul> </li> </ul>

	<p>CSS as harshly</p> <ul style="list-style-type: none"><li>- Vercel 250mb limit + (will tensorflow, stream-chat etc. affect this)</li><li>- Having it online would be good for testing etc. but is it okay if I make it only accessible by running the code</li><li>- Local is fine</li></ul>
